## TO INFINITY... AND BEYOND!

There can be little argument from anyone that 2020 has been a challenging year for the safe patient handling and mobility (SPHM) industry. Not only have we had the ongoing and uphill climb of convincing C-suite executives of the need to invest in SPHM technology, but we have also had the added disruption caused by the COVID-19 pandemic which has displaced SPHM once again from healthcare organizations' list of priorities. Staff struggle just to get through the day, and when their shift is over, they have little time for anything else.

There is, however, one very important factor to consider. We know when staff become stressed they are more susceptible to injury. It will be interesting to see whether the pandemic and its associated work/life stressors have indeed increased the number of musculoskeletal injuries to healthcare professionals.

There is one thing this pandemic has shown all who are involved with the SPHM industry and that is that the “new normal” will not be the same normal we had before the pandemic hit our shores in March 2020. Many adaptations have already been made. Training and educating staff on technologies has become a more explicit hybrid model of in-person and online training, with smaller groups of people being taught together, and a socially distant learning environment. Vendors have also found new ways to reach out to their existing and new clients that have involved less travel and more focused discussion through virtual technologies. Some vendors have even added to their portfolio during this time, diversifying into new product areas that meet the present needs of health care.

While none of us know what the end of 2021 will look like, there is one thing I know with 100% certainty. We need to embrace the changes we have made, learn from them, keep what is good, lose what hasn't worked, and be totally open to new ways of working. Only then can we embrace 2021 with a positivity that seeks to grasp the opportunities around us and allow them to take SPHM to the next level, *to infinity and beyond*.

# ALPHABETICAL COMPANY LISTINGS OF SAFE PATIENT HANDLING & MOBILITY PRODUCTS AND SERVICES

Welcome to the 2021 edition of the SPHM Vendor Directory & Resource Guide! The purpose of the directory is to provide a quick reference guide of key vendors in the industry who have been working tirelessly throughout the pandemic to support healthcare workers with the products and services needed in a timely manner.

We are also excited to announce that we have a “virtual” edition of the directory with a search function and product videos.

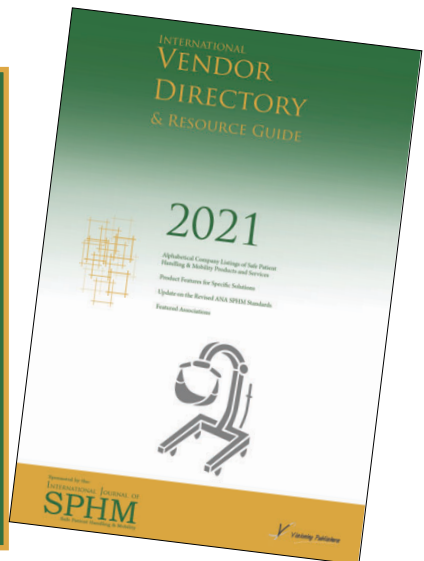

## Tell Your Colleagues!

Share a link to the 2021 Vendor Directory and Resource Guide with colleagues via email or social media. Anyone can download the PDF for free from the website at <https://sphmjournal.com/vendor-directory/>.

See page 26 for an Advertiser Index.

**We would like to thank all our vendors for choosing to be part of this directory.**

Let us know what you think and what you would like to see in the next vendor directory by emailing [info@SPHMjournal.com](mailto:info@SPHMjournal.com).

Alpha Modalities, LLC  
800-273-5749  
www.alphamodalities.com  
info@alphamodalities.com

Alpha Modalities is your source for patient slings for all lift systems sold in North America. We design and manufacture reusable, wipeable, and single patient use slings with either loop or clip attachment options. We offer customization on labeling, bar codes, RFID tags, and QR codes. With an industry first 3-year unlimited warranty, we also offer repair services on out of warranty slings.

Our fabrics are tested for breathability, durability and patient comfort. We also have pressure mapping data and radiolucent tests available upon request.

Amico Mobility Solutions Corporation  
877-462-6426  
www.amico.com  
info@amico.com

Amico Mobility Solutions is a leader and innovator in the patient lift industry. We are dedicated to manufacturing products with SPH in mind for both patients and clinicians. Amico's GoLift patient lifts are the smallest and most compact lifts on the market today. The seamless and aesthetically pleasing design allows the lift to blend in to any setting including acute care, long-term care, homecare, and operating rooms. Smooth edges and innovative technology allow the lifts to be effortlessly used and easily disinfected to target infection control. Our unique trolley adapter allows the ability for the lift to fit into any existing track system.

Amico Mobility Solutions is dedicated to ensuring the highest quality in product, communication, and customer provision. For more information, please visit [www.amico.com](http://www.amico.com).

Ansell Healthcare  
866-764-3327  
www.ansell.com/sandel  
sandel-cs@ansell.com

Ansell produces the SANDEL® Z-Slider™ Patient Transfer sheet for patient transfer and repositioning. Z-Slider is used across all areas of the hospital as well as in long-term care settings.

The Z-Slider provides a cost-effective method to move patients of any size. It is single patient use to help reduce the risk of cross-contamination, and is available in a variety of point-of-care dispensers to promote staff compliance. Plus, Ansell's clinical support team provides implementation support and staff training, making adoption easy.

## Alpha Modalities

*Your Sling Source for Safe Patient Mobilization*

We are an **industry leader** in providing **safe and comfortable** bariatric solutions. We offer a variety of products to help with ambulating, repositioning, and turning patients.

**SANDEL®**

Arjo Inc  
800-323-1245  
www.arjo.us  
US.CC@arjo.com

At Arjo, we believe that empowering movement within healthcare environments is essential to quality care. With a focus on the caregiver and the patient experience, and underscored by a foundation of dependability and safety, Arjo offers solutions across the mobility continuum, including ceiling and floor lifts, patient positioning devices and beds, and therapeutic seating.

In addition to products, we're proud to offer Diligent® Consulting, our three-year clinical solutions partnership program that offers a guaranteed 60% reduction in patient handling injuries by promoting safe mobility, ICU recovery, and falls prevention.

Atlas Lift Tech™  
415-283-1804  
www.AtlasLiftTech.com  
info@AtlasLiftTech.com

Atlas Lift Tech Inc. is a mobility solution provider. Atlas integrates Mobility Coaches in the hospital up to 24 hours a day. They are available on a scheduled or emergent basis through continuous rounding on the units, as well as in unit/bedside training. Mobility Coaches utilize Atlas' proprietary software which captures real-time analytics of all program related activity to drive mobility outcome success and to provide facility leadership with leading, lagging and real-time data. Atlas Mobility Coaches become your facility's experts on Safe Patient Handling and Mobility (SPHM) policies and procedures, training needs, and all SPHM equipment and devices. Mobility Coaches are a consistently available resource to train and assist your clinical staff at the bedside. The Mobility Coach Program reduces employee injury and patient risks associated with hospital acquired pressure injuries, falls and other negative outcomes of immobility.

ColoWrap, LLC  
1-888-815-3376  
www.colowrap.com  
sales@colowrap.com

51% of endoscopy nurses have experienced at least one musculoskeletal injury, and 24% have required time off. These injuries occur as a result of manual abdominal pressure and patient re-positioning, two unique patient handling responsibilities associated with colonoscopy.

ColoWrap is an easy-to-use lower abdominal compression device used to mitigate looping during colonoscopy. Looping is the leading cause of patient-handling injuries to staff, patient pain, and failed procedures. In clinical studies, **ColoWrap reduced the need for manual pressure and repositioning by up to 90%**. ColoWrap is single use and made of high-performance neoprene that maintains concavity under high stress and has a secondary strap that can be adjusted during the case to alter the direction/magnitude of compression, as needed.

Guldmann®

Guldmann Inc  
800-664-8834 or 813-880-0619  
www.guldmann.net  
info@guldmann.net

Guldmann doesn't just provide you with equipment that makes your job easier. You also get a complete solution designed to match your current needs as well as being well-aligned with the functionality requirements of tomorrow – consistently focused on providing more time for the actual care assignments at the heart of your operations. We are specialists in creating more “time to care” in conjunction with lifting and moving requirements across the full spectrum of healthcare environments.

Our products are designed to be combined, varied and used in a wide range of different ways, paving the way to uniquely effective solutions for tackling virtually all lifting and moving needs. This makes Guldmann solutions a dependable, durable and financially advantageous investment.

HoverTech International  
800-471-2776  
www.HoverMatt.com  
info@hovermatt.com

HoverTech International specializes in patient transfer and lift devices that reduce caregiver injury while maintaining patient comfort and safety. Leading the industry in air-assisted patient handling equipment, HoverTech offers the HoverMatt® and highly breathable HoverMatt® Single-Patient Use Air Transfer Systems for all-day patient care, including lateral transfers, boosting, positioning and proning. In the event of a patient fall, the HoverJack® Air Patient Lift can be used to effortlessly lift patients to bed/stretcher height. The HoverSling® Repositioning Sheet combines an SPU and sling to allow caregivers to use one product for most patient handling tasks, including: lateral transfers, repositioning, turning and vertical lifting. The Q2Roller® Lateral Turning Device facilitates easy and efficient lateral patient turning, enabling caregivers to easily perform Q2 turning regimens, hygiene and wound care.

International Journal of SPHM  
www.sphmjjournal.com  
info@sphmjjournal.com

The *International Journal of Safe Patient Handling & Mobility (SPHM)* is the only peer reviewed journal dedicated to the SPHM industry. With a worldwide online distribution, we are excited to include even more features and articles in the 2021 issues, plus a dedicated section for Early Mobility. If you are a patient safety leader, SPHM Champion, researcher, vendor, occupational health nurse, or leader of an early mobility initiative, then visit [www.sphmjjournal.com](http://www.sphmjjournal.com) to find out more about what the journal has to offer and subscribe today! Do you have an article idea or something you have written but are currently unpublished? We offer a mentorship program for new authors and would be happy to discuss your idea or work. Email [info@SPHMjournal.com](mailto:info@SPHMjournal.com) for more information.

# THERE'S NO TIME TO WAIT.

Quickly & safely prone, transfer, turn and boost patients with as few as two caregivers using the HoverMatt® Air Transfer System.

[www.HoverMatt.com](http://www.HoverMatt.com)

Jamar Health Products, Inc.  
414-529-5175  
www.patran.net  
patrans@patran.net

Jamar Health Products provides safe patient handling and mobility solutions with its selection of PATRAN® slide sheets. PATRAN slide sheets can be used up to 50 times with a single patient for more than 25 patient handling tasks, including lateral transfer, repositioning, mobility activities and therapy, inserting mobile imaging devices, and fall recovery. PATRAN slides sheets provide patient comfort, reduce caregiver injuries and promote infection control in just about every area of a hospital from the emergency department to the operating room, from the patient room to physical therapy. PATRAN slide sheets can be used in long-term care facilities and ambulatory surgery centers and for emergency care – anywhere a caregiver moves patients. PATRAN slide sheets also protect mortuary specialists and funeral directors handling decedents.

LiftSeat Corporation  
877-665-4381  
www.liftseat.com  
info@liftseat.com

LiftSeat Corporation is a US-based company that develops, manufactures and markets a full line of toilet transfer solutions that reduce falls and increase patient and caregiver safety. Our high quality powered toilet lifts are designed to meet the rigorous clinical requirements of the institutional healthcare market.

LiftSeat's foundational research led to the development of our patented LiftTek~ Core Assistive Technology, which reduces the physical force necessary to support the sit-to-stand motion path required for getting on and off the toilet.

WE IMPROVE YOUR LIFE

LINAK U.S. Inc.  
502-253-5595  
www.linak-us.com  
info@linak-us.com

Providing safe and powerful movement to patient lifting equipment, LINAK is dedicated to helping provide patients and caregivers with a safe lifting solution. Over 25 years of knowledge and market insights are the foundation to develop reliable actuators and medically approved actuator systems for patient lift applications. Our new LIFT™ solution is streamlined, efficient and easy to use. With a strong focus on ergonomics, the LED status lights can be seen from above to minimize unnecessary bending. Battery replacement is designed to be performed with one hand – thanks to a light-weight Li-Ion battery. The solution also includes features like wireless controls and turbo-boost, which cuts wasted waiting time to a minimum.

**MCAULEY MEDICAL, INC.**

*Safe Patient Handling Solutions*

McAuley Medical, Inc.  
888-399-7287  
www.mcauleymedical.com  
john@mcauleymedical.com

Lateral Transfer: Our Patented “Heat Sealed” GOLD Rollboard for lateral transfer is 100% Made in the USA. Needle and thread stitching has been eliminated and our advanced Anti-Microbial additives emit silver ions for the life of the product keeping materials fresh and clean.

**Sizewise**<sup>®</sup>  
Designed to heal

Sizewise  
800-814-9389  
www.sizewise.com  
info@sizewise.com

Sizewise designs, manufactures, and distributes state-of-the-art medical equipment, dedicated to advancing patient care and promoting caregiver safety. We offer a full line of products and solutions designed to improve safe patient handling, prevent patient falls, and reduce pressure injuries. Our equipment is manufactured in the US and distributed nationwide for rental or purchase.

 **SLOAN**  
medical

Sloan Medical  
800-782-3742  
www.sloanco.com  
info@sloan.com

Sloan Medical has been a leading manufacturer of high-quality polyethylene disposable products for 30 years. Our EZGlide<sup>®</sup> is a disposable latex free slide sheet designed to reduce friction when repositioning or laterally transferring patients. The EZGlide<sup>®</sup> is an inexpensive tool that your staff can utilize in a diverse variety of settings. From wheelchair transfers, vehicle extractions, and bed repositioning to lateral patient transfer and rehabilitation exercise assistance, the EZGlide<sup>®</sup> can stay with the patient for the duration of their stay in the hospital or long-term care facility. The EZGlide<sup>®</sup> will keep your staff safe from workplace injury and create a much more comfortable transfer experience by reducing friction and the effort needed to move the patients you care for.

Stryker  
269-385-2600  
www.stryker.com

Stryker is one of the world's leading medical technology companies and, together with our customers, is driven to make healthcare better. We offer innovative products and services in Orthopaedics, Medical and Surgical, and Neurotechnology and Spine that help improve patient and hospital outcomes. Sage is a business unit within the Stryker Medical division. Sage creates innovative solutions to help improve patient outcomes and caregiver efficiency across the continuum of care. Sage products bring caregivers confidence by helping reduce the risk of hospital-acquired conditions such as skin injury due to incontinence and pressure injuries, surgical site infections, pneumonias and healthcare worker injury. We are driven to solve real problems and make healthcare better for our customers and the patients they serve.

Tollos  
888-363-7224  
www.tollos.com  
customerservice@tollos.com

For decades, Tollos has helped create a safer, healthier future by providing a broad portfolio of mobility equipment to clinicians and patients throughout North America. In keeping with our history of innovation, we've introduced strategies designed to assist you with implementing and maintaining clinician and patient safety programs. With Tollos as a long-term partner, you can rest assured that we're consistently working to improve outcomes. From repositioning aids to built-in ceiling lifts, all aspects of patient mobility are covered. Let Tollos create a complete program for you as we strive to be your clinical partner of choice.

Vancare, Inc  
800-694-4525  
www.vancare.com  
info@vancare.com

Vancare has been serving the Safe Patient Handling market with quality, American-made products for over 25 years and takes great pride in being technology leaders within the industry.

We proudly supply and manufacture floor lifts, ceiling lifts, and patient transfer devices, handling the lightest transfer up to your 1000 pound bariatric patient needs. Vancare has been able to do all of this and remain as leaders by truly listening to our customers' needs and requirements and acting on them. Treating the customer the way they deserve as part of our Vancare family is what we do.

## BATHING/SHOWERING/TOILETING

**Product Name:** Carendo®

**Product Information:** The *Carendo* multipurpose hygiene chair facilitates an efficient hygiene and showering routine within a single transfer. The Care Raiser function enables you to gently lift your patient or resident's lower body with the touch of a button, allowing access for performing discreet hygiene tasks while maintaining the patient or resident's dignity.

See company listing on page 8 (Arjo Inc).

**Product Name:** Hercules Patient Repositioner™

**Product Information:** Using the Hercules Patient Repositioner™, one caregiver can safely boost a patient in seconds. The patient lies on a soft sheet pulled by an easy-to-use drive, moving the patient up in bed with the simple push of a button. This process preserves the patient's dignity --and protects the caregiver's back.

See company listing on page 12 (Sizewise).

**Product Name:** Z-Slider™ XL Patient Transfer Sheet

**Product Information:** The Z-Slider™ XL patient transfer sheet helps prevent healthcare worker back injuries during patient handling. Longer and wider than the standard Z-Slider™ sheet, the Z-Slider™ XL patient transfer sheet is designed to move bariatric and taller patients. The Z-Slider™ XL sheet is offered in a convenient single-pack.

See company listing on page 6 (Ansell Healthcare).

**Product Name:** HoverMatt™ and HoverMatt™ Single-Patient Use

**Product Information:** Move patients of all sizes in a safe and dignified manner with the HoverMatt® Air Transfer System. Full-sized HoverMatts have a weight limit of 1200lbs, are radiolucent and MRI compatible, and reduce the force required to move patients by 80-90%.

See company listing on page 9 (HoverTech International).

**Product Name:** Tenor®

**Product Information:** The *Tenor* mobile floor lift is specifically designed for lifting and transferring bariatric patients or residents. The lightweight aluminium structure provides a safe working load of 704 lb and the design enables 360-degree movement of the patient during transfer and positioning.

See company listing on page 8 (Arjo Inc).

**Product Name:** HoverJack® Air Patient Lift

**Product Information:** The HoverJack® Air Patient Lift has a 1000 lb weight limit and allows caregivers to safely lift individuals who have fallen without gathering a lift team.

See company listing on page 9 (HoverTech International).

## CAR TRANSFER

**Product Name:** Maxi Twin® Compact

**Product Information:** The *Maxi Twin Compact* is designed for tight spaces and efficient and safe transfers. By utilizing the easy positioning and smooth maneuvering, caregivers are able to transfer patients with a comfortable working posture and less physical exertion.

See company listing on page 8 (Arjo Inc).

## CEILING LIFTS

**Product Name:** GH3

**Product Information:** It is designed for use in almost all professional care settings, and with a lifting capacity of up to 400 kg on a single strap, it is ideal for use in bariatric care. The GH3+ ceiling hoist can be fitted with one or more modules from the Guldmann Care Lift Management (CLM) system, which streamlines everyday use of the ceiling hoist system and helps make it more efficient.

See company listing on page 9 (Guldmann).

**Product Name:** Tollos Ceiling Lifts

**Product Information:** At Tollos, we design our ceiling lifts ergonomically; mindful of both patient comfort and clinician safety. Our lifts offer a secure ride, durability, and are easy to maintain & operate.

See company listing on page 13 (Tollos).

**Product Name:** Maxi Sky® 2

**Product Information:** The *Maxi Sky 2* ceiling lift series delivers a complete and intuitive patient handling solution that assists you in safeguarding the well-being of everyone during the transfer process. The ceiling lifts are designed to accommodate a single caregiver transfer without any manual lifting. Available in an Infection Control version with features to help minimize the risks of cross infection in ceiling lift transfers.

See company listing on page 8 (Arjo Inc).

## CONSULTANTS

**Product Name:** Diligent® Consulting

**Product Information:** *Diligent Consulting* is Arjo's three-year clinical solutions partnership program that supports health care facilities by promoting early, safe mobility through guaranteed improved outcomes. For the past 20 years, *Diligent Consulting* has delivered an average 84% reduction in the number of patient handling related injuries across more than 800 facilities. New program components include Falls Prevention and ICU Recovery.

See company listing on page 8 (Arjo Inc).

## EARLY MOBILITY

**Product Name:** Sara® Combilizer

**Product Information:** With a focus on ICU recovery, *Sara Combilizer* enables unconscious, sedated or mechanically ventilated patients to be mobilized in different standing or sitting positions for several hours per day.

See company listing on page 8 (Arjo Inc).

**Product Name:** GH3+ Trainer Module

**Product Information:** With the Trainer Module, it is possible to start rehabilitation with dynamic weight relief already in the patient's room. Typical rehabilitation exercises with dynamic weight relief in the Trainer Module could be: Gait training, balance, sit-to-stand, squat exercises, steps on/over obstacles etc.

See company listing on page 7 (Guldmann)

**Product Name:** Total Lift® Bed

**Product Information:** The *Total Lift Bed* is an advanced, upright positioning bed that can progressively move patients to a full standing and weight-bearing position in order to aid rehabilitation early in the acute phase of critical illness. Without leaving the bed, patients who need a graded transition from bed rest to supporting their full body weight can be progressively moved to the standing position as early and frequently as tolerated.

See company listing on page 8 (Arjo Inc).

## FRICION-REDUCING DEVICES

**Product Name:** HoverMatt™ and HoverMatt™ Single-Patient Use

**Product Information:** The HoverMatt® Air Transfer System reduces the force required to move patients by 80-90%.

See company listing on page 9 (HoverTech International).

**Product Name:** Z-Slider™ Patient Transfer Sheet

**Product Information:** The Z-Slider™ patient transfer sheet helps prevent healthcare worker back injuries during patient handling. Disposable to help prevent cross contamination, the Z-Slider™ sheet is offered in a variety of point-of-care dispensers to promote staff compliance.

See company listing on page 6 (Ansell Healthcare).

**Product Name:** AirPal® Air-assisted Technology

**Product Information:** The *AirPal* system creates easier, safer transfers that prevents pain and skin breakdown for patients/residents. Without tugging or pulling, *AirPal* uses a cushion of air to safely transfer and reduce the risk of caregiver injury.

See company listing on page 8 (Arjo Inc).

## FOCUS ON FALLS

**Product Name:** HoverJack® Air Patient Lift

**Product Information:** The HoverJack® Air Patient Lift allows caregivers to safely lift individuals who have fallen without gathering a lift team.

See company listing on page 10 (Hovertech International).

**Product Name:** Sara® Steady

**Product Information:** The *Sara Steady* enables a single caregiver to assist patients or residents throughout the day. *Sara Steady* is non-powered and easy to operate.

See company listing on page 8 (Arjo Inc).

## MOBILE LIFTS

**Product Name:** Vancare Mobile Lifts

**Product Information:** VANCARE offers a wide array of full body, sit-to-stand, and bariatric mobile floor lifts to safely transfer people while significantly reducing the risk of injuries among caregivers. Our assortment includes models that accommodate people weighing up to 1000 lbs.

See company listing on page 13 (Vancare, Inc).

**Product Name:** Tollos Mobile Lifts

**Product Information:** At Tollos, we design our mobile lifts ergonomically; keeping both patient comfort and clinician safety in mind. Our lifts are perfect for patient mobility, repositioning, gait training, and rehabilitation activities.

See company listing on page 13 (Tollos).

**Product Name:** Maxi Move®

**Product Information:** The *Maxi Move* is designed to enable a single caregiver to manage demanding everyday patient transfer and repositioning tasks. With its Dynamic Positioning System (DPS), *Maxi Move* helps prevent the sling from swinging during transfers and provides excellent stability.

See company listing on page 8 (Arjo Inc).

## PATIENT TRANSPORT

**Product Name:** Sage AirTAP LC  
Lift Compatible Patient Repositioning System

**Product Information:** We understand the importance of early mobility. To achieve your mobility protocols and comply with guidelines, you need a readily available solution that stays under your patients and fits seamlessly into your workflow. That's why we combined our innovative air assist technology with lift compatibility to promote safety and mobility.

See company listing on page 13 (Stryker).

## SEATING SOLUTIONS

**Product Name:** Sorrento®

**Product Information:** Designed to improve and maximize comfort as well as provide postural support and pressure management, the Sorrento offers clinical, therapeutic seating in a simple to operate, adjustable chair. A bariatric version is also available.

See company listing on page 8 (Arjo Inc).

## SLINGS

**Product Name:** Tollos Slings

**Product Information:** Put your faith in Tollos quality. Did you know reusable and disposable slings are a Class I Medical Device? At Tollos, we take compliance with federal regulations seriously. Don't compromise.

See company listing on page 13 (Tollos).

**Product Name:** HoverSling® Repositioning Sheet

**Product Information:** The HoverSling® Repositioning Sheet functions as both a HoverMatt® Single-Patient Use Air Transfer Mattress and sling to streamline patient handling tasks and decrease the amount of time and money spent using multiple products.

See company listing on page 10 (Hovertech International).

## TASK SPECIFIC SOLUTIONS

**Product Name:** RotoProne® Therapy System

**Product Information:** The *RotoProne Therapy System* is a comprehensive system that provides an efficient and effective way to provide automated prone therapy at the touch of a button.

See company listing on page 8 (Arjo Inc).

**Product Name:** ColoWrap Colonoscopy Anti-Looping Compression Device

**Product Information:** ColoWrap is an easy-to-use lower abdominal compression device used to mitigate looping during colonoscopy. ColoWrap enhances the safety of colonoscopy by minimizing the need for staff applied manual pressure and patient repositioning.

See company listing on page 8 (ColoWrap).

301-628-5090

<https://www.nursingworld.org/>

The American Nurses Association (ANA) is the premier organization representing the interests of the nation's 4.2 million registered nurses. ANA is committed to driving initiatives that prevent unnecessary injury and keep both healthcare consumers and nurses safe.

Injuries and musculoskeletal disorders (MSD) are often caused by manually lifting patients, and all professionals are at high risk every day. The consequences can be devastating for health care professionals, MSDs are responsible for more lost work time, more long-term medical care needs, and more permanent disabilities than any other work-related injury. Through Safe Patient Handling and Mobility (SPHM) programs and advocacy, ANA is working to establish a safe environment for nurses and all health care professionals, with the complete elimination of manual patient handling as our goal. The use of technology, especially lifting devices, is critical to the success of these programs.

### **Coming in Late Spring 2021!**

Safe Patient Handling and Mobility Interprofessional National Standards Across the Care Continuum, 2nd Edition.

These Standards have updated language with references, evidence-based resources, and a robust introduction including use of technology, the value of data, trends and issues related to SPHM, and a history of SPHM!

# FEATURED ASSOCIATIONS

**The Association of Safe Patient Handling Professionals**  
[www.asphp.org](http://www.asphp.org)

Our mission is to improve the safety of caregivers and their patients by advancing the science and practices of Safe Patient Handling and Mobility (SPHM). To support this mission, we established standards for SPHM professionals to improve the quality of the patient-handling process across the continuum of care. These standards are promoted through a three-tiered certification program and educational opportunities, including webinars and national and regional events where you can collaborate with others in your field. Certified SPHM professionals add value to a health care organization by reducing workers' compensation claims costs and ultimately improving patient outcomes. Membership offers free and reduced-priced benefits.

**Australian Association for the Manual Handling of People (AAMHP)**  
[www.aamph.org.au](http://www.aamph.org.au)

The Australian Association for the Manual Handling of People is a voluntary group of likeminded people all striving for a common goal, “Injury prevention for both worker and client in the workplace”. Established 21 years ago, we support national forums that aim to build strategies and resolve the constant issue of muscular skeletal disorders within the industries providing care to others. Ultimately, over the years we have found that we are achieving much more than this, wellbeing and resilience are words that resonate with the members, demonstrated through the accumulative works presented at our biannual international conferences.

## Manual Handling Association of New Zealand

[www.mhanz.org.nz](http://www.mhanz.org.nz)

The primary aim of Mhanz is to share moving and handling knowledge in New Zealand through promotion, innovation and education. New Zealand is one of the few, if not the only western country that does not have legislative, Ministry of Health Directives or professional body/union/employer requirements in this area. In view of this, improving the credibility of Mhanz through professional development has been crucial to its progress. To date Mhanz has hosted multiple updating and networking events and is an established conduit for government and educational organisations to talk to the industry. Mhanz was integral to the introduction of the post graduate qualification in moving and handling (based on the curriculum in Loughborough University, UK). Mhanz has regional groups across the country and meetings are held 3-4 times a year.

## National Back Exchange (NBE)

[www.nationalbackexchange.org](http://www.nationalbackexchange.org)

NBE is a UK multi-disciplinary membership association with almost 1000 members. The primary aim of the association is to promote standards and excellence for the moving and handling of people and loads across all sectors in line with evolving research evidence. NBE members are drawn from a wide variety of clinical and healthcare settings and range from members primarily involved with training to those who are involved at a strategic level both regionally and nationally.

The association has a resource packed website, produces a range of publications, and a quarterly digital magazine [nbecolumn.co.uk/](http://nbecolumn.co.uk/) as well as providing virtual networking events and the premiere residential manual handling conference in the UK.

## A complete portfolio with a focus on outcomes

From caregiver injury to patient falls, to pressure injuries and more, there are few programs in healthcare that can have positive impacts across so many aspects of care. Arjo proudly offers a full range of solutions across the mobility continuum to meet you wherever you are in your patient handling and mobility journey.

Ceiling lifts

Passive floor lifts

Standing and raising aids

Patient positioning devices

Therapeutic seating

Looking for more support? For the past 20 years, Diligent® Consulting has delivered an average 84% reduction in the number of patient handling related injuries across more than 800 facilities. New program components include Falls Prevention and ICU Recovery.

# Guldmann™

## Press Play

Do more than just up and down

The world's only patient ceiling lift with  
**Dynamic Body Weight Support**

## Start Sooner

Transfers to early training

The Trainer Module adds another option to many application possibilities that the Guldmann ceiling hoist offers besides lifting up and down.

With the Trainer Module it is possible to start rehabilitation, fall prevention and early mobilization with dynamic weight relief already in the patient's room.
